

Dr. Nirupa Shyam Mogili

Young Professional – III (Scientific)

Nirupa was drawn into exploring biological sciences as she was intrigued by the diversity of life forms, the gamut of physiological processes, the meticulous biochemical wiring and programming that ensues harmony in all life beings. She holds a doctorate in Biochemistry from CSIR- Central Leather Research Institute, Chennai. Nirupa pursued her Masters in Biochemistry from University of Madras. As a part of her research work, Dr. Nirupa reported impaired angiogenic balance as a crucial mechanism leading to scarring of skin in humans. She also identified housekeeping and collagen genes related to wound healing from *Polypedates maculatus*, an Indian shrub frog. Her research work has been published in international and national journals of repute. Prior to joining the NBA fraternity, Nirupa was employed as Assistant Professor at M.O.P. Vaishnav College for Women, Chennai. Nirupa enjoys listening to all genres of music and sings as well. She is an avid book reader.
